

Microsoft C# .NET Web Developer

Inergize Digital, a division of Newport Television LLC, is the industry-leading provider of fully integrated digital management solutions that generate revenue for local media companies. The Company's content management system leverages the power of video, e-mail and syndication delivery, online directories as well as advertising leadership in contests and gaming to create profitable Web sites and campaigns for local television, radio, newspaper, magazine and other media companies.

Inergize Digital is a quickly growing company in need of a Microsoft C# .NET Web Developer to join its headquartered office in Minneapolis, Minnesota.

Job Description

Inergize Digital is seeking a Microsoft C# .NET Web Developer to plan, develop and test Microsoft C# .NET web-based applications. Web developers work on cutting-edge Web sites and distributed software systems by combining C#, ASP.NET and SQL Server with emerging technologies such as Ajax, LINQ, jQuery and JSON.

At Inergize Digital, Web developers work independently and as part of a team to define requirements, use cases, database design, present, test and deploy Web sites and online products.

Job Responsibilities

Confirm site objectives by analyzing and validating user requirements, identifying new features and functionality, while streamlining and upgrading existing features.

Develop Web applications by studying existing technology architecture; analyzing browser compatibility techniques; evaluating solution alternatives; developing prototypes; building n-tier, scalable and multimedia applications; programming objects, events, functions, error trapping, data verification, animations, interactions and dynamic updating; designing, installing and configuring databases, and completing documentation.

Develop user interfaces by preparing a workflow chart and diagram based on subject matter, human factors and business logic.

Integrate applications by studying and establishing connectivity with network systems, databases, search engines and information servers.

Verify and maintain team accomplishments by communicating essential information, coordinating actions, obtaining expert input, reviewing open issues and action items, and contributing information to team meetings and reports.

Reduce costs and improve serviceability by preparing reusable component design.

Required Education/Experience

Bachelor's degree in MIS, Computer Science or Computer Engineering from an accredited university or equivalent relevant work experience.

Two to five years work experience planning, developing and testing Microsoft C# .NET web-based applications, as well as experience in ASP.NET and SQL Server. Experience with additional technologies is preferred.

Experience working both independently and in a collaborative team environment.

Ability to work in a deadline-driven environment.

Ability to manage multiple priorities at one time, while accepting project ownership.

To apply, please e-mail your cover letter, resume and salary requirements to jobs@nergizedigital.com, fax to (952) 417-3407 or mail to:

Inergize Digital
Attn: Connie Boran-Turbes
1600 Utica Ave S, #400
Minneapolis, MN 55416

All applicants will be required to furnish proof of identity and legal work authority.

No phone calls please.
